# Promotional Email Campaign

Developed copy for targeted email blasts, including the educational and institutional markets, for international and U.S. distribution.

## Prepare your students to take the lead

PASW® STATISTICS CAN BE THE KEY

## Prepare your students for real-world challenges

PASW® STATISTICS CAN BE THE KEY

## Prepare your students for real-world opportunities

PASW® STATISTICS CAN BE THE KEY

### Build your statistics course with our free curriculum materials

To play a critical role in answering tomorrow's research questions, your students will have an advantage if they are well trained in analyzing data.

PASW Statistics from SPSS Inc. is the easy-to-use, affordable data analysis software you can incorporate into your courses. Because it's the industry-leading data analysis software, teaching with PASW Statistics helps students transition into advanced statistics and quantitative courses and prepares them for successful careers in research.

PASW Statistics is the preferred instructional resource for your students to:

- Learn statistical concepts and research methodologies applicable for real-world scenarios
- Use with minimal instruction and without need for programming
- Understand quickly with help from tutorials and case studies

Its flexibility provides students complete access to all data analysis functionalities from their personal laptops or from computer labs on campus.

Visit the [SPSS Academic Resource Center](#) to download free materials to help you integrate PASW Statistics into your research methods courses.
